Single Mom Earns \$300.00 every morning before taking the kids to school, and claims she can show anyone how to do it too.

**OIL MONEY**

# OIL TRADER

“You have got to be kidding me”, were the first words that came out of my mouth when I read that headline, but as I took a closer look, my eyes got wider and wider as I realized that she was on to something.

We are so jaded to the whole concept of making easy money because we’ve heard so many stories that turn out to be not true. Our friends will invite us to a business opportunity party or meeting where they claim we will be shown an easy way to get rich. Then it turns out we’d have to be selling lotions and potions to our friends and family.

Who wants to do that?

Or any number of other BS stuff you can find on the internet that claims easy riches. Well, I hope you are not too jaded yet, because what this single mom discovered is real and it’s easy and anyone can do it in their home, every morning and you never have to talk to anyone ever.

My investigation further revealed that if you follow the program she discusses, you can actually earn a whole lot more than \$300.00 a day. In fact there is nothing stopping anyone from earning \$1,000.00 or more Monday through Friday.

So, the natural question to ask is what is it and why isn’t everyone doing it, right?

Well, there are a million reasons one could give to answer those two questions, but instead, I’m going to explain exactly how this system works and show you how you can get involved and start making this kind of money almost immediately.

# The Rich Do it Why Not Me?

The truth is there have been and always will be different things that anyone can do to make money. The problem is that most ordinary people never learn of them or if they do they are intimidated by their lack of knowledge on the subject.

This is one of those strategies that the rich use every day, but we never get a chance to learn about it because we move in different circles, if you know what I mean.

There is not a single person reading this report right now who would not do something to earn extra income if they could fit it into their schedule.

Some people get night jobs or work extra hours, or work on the weekends. But the problem is that no matter how you look at it, all you are doing is trading hours for a little bit of money, and if you are doing that, you are sacrificing something very valuable, and that's probably your family and or your health.

## She Found The Answer

So, back to my story about this lady who found the answer; in a casual conversation with some co-workers she heard someone mention that her husband was making a fortune trading oil futures.

She was intrigued by this and when she got home that evening she went about researching the subject to see what she could find out. She went to You Tube and looked up Oil Trading and watched countless videos on the subject, and then she Googled it as well and discovered even more about how people made money trading oil futures.

The most fascinating and exciting thing she discovered was that it seemed to be so easy to do that anyone could do it, including her.

OIL MONEY

# What's the Catch

But nothing could be that simple, there had to be a catch, so she continued her research and what she discovered was that there is no catch.

What she discovered is that anyone who wanted to could learn how to do this simple thing and earn as much money as they wanted and even better yet, you could do it with very little risk of losing anything.

I know this may sound a little far fetched, but it's not, I assure you. Absolutely anyone, no matter how rich or poor can do this every day and make money every day. I'm not kidding.

Does it take a few bucks to get started? Yes, but that should not stop anyone from doing this. Unfortunately, it will and that is the answer to one of the questions we asked above.

The main reason why everyone won't do this is because you need a few bucks to get started and most people would rather spend their money being consumers and buying stuff like a bit flat screen TV or a new car or some other thing that will never get them anywhere.

But, more on that later, right now I'm sure you are itching to know what it is and how it works, and that is what I'm going to tell you next, so lets get to it.

## Oil Futures

Now before you tune me out, stay with me for just a few more minutes. It doesn't matter what you do there is going to be a learning curve, and it's no different with this.

At first everything is going to look and feel really different and strange to you so just accept that so we can move on to the good stuff.

Human nature often gets in the way of our success and we start saying things like "oh, I don't know a thing about oil futures" or "sure, I can just see myself losing the house and everything playing around with oil futures" or some other stupid and negative thing you can probably come up with that will keep you safely right where you are doing nothing.

But for those of you who are a little more adventurous and are willing to at least hear me out, I have news for you. You, yes, You, can earn \$100.00 to \$1,000.00 or more every day of the work week trading oil futures right from your home computer and I can show you how without risking a single dollar.

The words "OIL MONEY" are rendered in a bold, 3D, blocky font. The letters are primarily black with a green-to-yellow gradient on the right side. The text is set against a dark, splattered background that looks like oil or paint on a light surface. The letters are slightly shadowed, giving them a three-dimensional appearance.

# Do I have your ATTENTION?

GOOD, because this is the best stuff you have ever seen in your life. I mean seriously, what could be better than logging onto your Ninja Trading platform every morning, making 1 or 2 simple trades within a thirty minute period? When you are done, you turn the computer off and go do whatever you want for the rest of the day.

That whole bit about earning money is handled. That thing that used to take up your entire day is handled. That part that separated you from your kids and forces them to grow up in child care is handled. That part that you complain about to your spouse, co-workers and anyone else who will listen is handled.

You have a choice and the choice is right here in this report.

Oil is a commodity and is traded on an exchange in the same way other commodities are traded, like grain, gold, pork bellies, and currencies.

You buy low and sell high, or buy high and sell low. Investors and ordinary people like us can buy an oil contract with a click of the mouse on Ninja Trader and sell that same contract a few minutes later when it has earned us a few pennies.

Each penny the price of a barrel of oil moves can earn you \$10.00, and the price of a barrel of oil fluctuates dramatically all day long.

The good news for us is that there are clearly identifiable technical moves that the oil market makes every morning between the hour of 7:45AM Central Daylight Time, and 8:30AM Central Daylight Time. During this 45 minute window is where we make our money.

**OIL MONEY**

# All you need is 10 Cents

Think about it, the price of oil fluctuates between several cents and several dollars in any given period of time. But we are not looking for dollars, we are looking for just a few pennies, and we can predict when the pennies are going to go in our direction.

The biggest problem you will have is being able to discipline yourself to get out when you have made your daily trade and stay out. This will be your biggest challenge.

If you can get out when you have made your 5 to 10 cents and stay out, you will get rich doing this. If you stay in and try to “chase” the market, you will loose and you will go broke and you will not last.

We do this as a lifestyle, in fact my partner calls what we do “LIFESTYLE TRADING” and the way we teach you is how to trade as a lifestyle. Heck, think about it, if you are making \$300.00 a day at your job and you learn how to make \$300.00 a day in oil, why push the envelope and take more risk? Don't do it. Get out. Make your \$300.00 on one trade and leave it alone.

This is the discipline and if you can master this, if you can master yourself, you will get rich trading oil. If you are not able to discipline yourself to trade the way we teach you, then you will not last long and you will be frustrated and probably broke.

Now, enough of the negative stuff, but it was important that I let you know this part. We will teach you how to trade conservatively, and if you follow our instructions and don't allow your emotions to get in the way, you will make lots of money fast.

# OIL MONEY

# It's just that EASY

The first thing I want you to realize is that you don't have to learn a bunch of stuff. We will teach you everything you need to know to trade competently and we will be there by your side every step of the way.

And here is the best part; we all trade together every Friday on a live webinar. That's right, you will be on a live webinar with us and the rest of the trading group so you will never be alone.

I remember when I first started, I was nervous as hell the first day until I realized I had our founder and a bunch of other people on the webinar with me doing the same thing.

The leader of the webinar will call out developing trends and make suggestions of entry and exit points on the chart. He will also share helpful tips on new strategies that will assist you in your ongoing training and education.

# OIL MONEY

## Start with MONOPOLY money

Remember when I said you can start doing this without risking a single penny? Well here is how we do that. We will set you up with a simulated trading program that will allow you to trade right along side us on the exact same platform except for one thing, it's simulated.

This means you can “practice” trade for as long as you want until you are ready to do it for real. Now, let me ask you something, if you could practice any skill until you “got it” do you think you could learn it? How about if it was fun practicing? That would be even better wouldn't it?

Well, let me tell you, this is going to be more fun than you can imagine, because the reality is that it all translates into money in your pocket.

Once you join our group we will take you by the hand and get you all set up. We will train you with our Trading/Training videos in our members area and you will begin trading on your simulator until you are ready for live trading.

This is a real life changing opportunity for you, but do you see it? The sad thing is that even those who do see it will be scared away from it because of their own unfounded and unreasonable fears.

We developed this program for the housewife, the regular guy, not the experienced trader or investor.

You can join our group of ordinary people trading in the most conservative manner and begin making money every day.

You can prove it to your self before you risk a penny so there is absolutely nothing to lose.

## Do you have the answer?

Yes

No

OIL MONEY

# What's Next?

Do a little research. Check it out. Go to You Tube, Craigslist and other places and learn as much as you can about the general concept.

You will find other trading groups out there and you should talk to those people running those trading groups. The main difference between us and them is the cost to join our group. We don't charge a lot, and as a result, we have a larger group and we get to teach more people how to do it.

If you want more information about how you can get involved with us and learn how you can earn \$100 to \$900 a day trading oil futures, drop us an email at [CustomerService@theoilmoney.com](mailto:CustomerService@theoilmoney.com) and I'll send you an invitation to our weekly conference call.

You should take your time and don't rush into this or any other money making opportunity until you have thoroughly investigated it.

But, when you are ready to go, we will be ready to help you.
